

CUSTOMER CODE OF PRACTICE FOR MANAGING WASTE STREAMS

PESTICIDE CANS must be triple rinsed and collected in the bag provided.

FOILS and CAPS must be removed and placed in a separate bag inside the larger bag containing the PESTICIDE CANS.

SEED BAGS and FERTILISER BAGS should be placed inside one another or tied in manageable bundles.

CARDBOARD should be flat packed and either stacked and tied in bundles or placed in a fertiliser or seed bag.

SILAGE WRAP AND CROP COVER needs to be dry and free from as much contamination as possible.

POLYTHENE SHEET AND SHRINK WRAP should be rolled up, put into bags provided and tied off.

Recyclable TREE GUARDS, made from PP Corex can be packed into our Bulk Bags, with all cables, ties bagged separately. TREE GUARDS made from PVC must be placed in a separate bag.

TRICKLE TAPE and IRRIGATION PIPING must be coiled and placed in a separate bag.

PLANT POTS and PUNNETS can be recycled but must be placed in separate bags.

IBCs must be triple rinsed.

STRING OR NET WRAP should be placed into a separate bag and tied off.

Through proper segregation of your farm plastic it ensures maximum amount of farm plastic is recycled and helps us work towards zero plastic farm waste being landfilled.
